<p>Springer Handbook of Materials Measurement Methods-Horst Czichos 2007-04-13 This Handbook compiles advanced methods for materials measurement and characterization from the macroscopic to the nano-scale. Materials professionals need not only handbooks of materials data but clear guidelines and standards for how to measure the full spectrum of materials characteristics of new materials ans systems. Since materials science forms a bridge between the more traditonal fields of physics, engineering, and chemistry, unifying the varying perspectives and covering the full gamut of properties also serves a useful purpose. This handbook is the first dedicated to these practical and important considerations.</p>

<p>Free, Fair, and Alive-David Bollier 2019-09-03 The power of the commons as a free, fair system of provisioning and governance beyond capitalism, socialism, and other -isms. From co-housing and agroecology to fisheries and open-source everything, people around the world are increasingly turning to 'commoning' to emancipate themselves from a predatory market-state system. Free, Fair, and Alive presents a foundational re-thinking of the commons — the self-organized social system that humans have used for millennia to meet their needs. It offers a compelling vision of a future beyond the dead-end binary of capitalism versus socialism that has almost brought the world to its knees. Written by two leading commons activists of our time, this guide is a penetrating cultural critique, table-pounding political treatise, and practical playbook. Highly readable and full of colorful stories, coverage includes: Internal dynamics of commoning How the commons worldview opens up new possibilities for change Role of language in reorienting our perceptions and political strategies Seeing the potential of commoning everywhere. Free, Fair, and Alive provides a fresh, non-academic synthesis of contemporary commons written for a popular, activist-minded audience. It presents a compelling narrative: that we can be free and creative people, govern ourselves through fair and accountable institutions, and experience the aliveness of authentic human presence.</p>

A generation of “Makers” using the Web’s innovation model will help drive the next big wave in the global economy, as the new technologies of digital design and rapid prototyping gives everyone the power to invent--creating “the long tail of things”.</p>
<p>Imagination and Fantasy in the Middle Ages and Early Modern Time-Albrecht Classen 2020-08-24 The notions of other peoples, cultures, and natural conditions have always been determined by the epistemology of imagination and fantasy, providing much freedom and creativity, and yet have also created much fear, anxiety, and horror. In this regard, the pre-modern world demonstrates striking parallels with our own insofar as the projections of alterity might be different by degrees, but they are fundamentally the same by content. Dreams, illusions, projections, concepts, hopes, utopias/dystopias, desires, and emotional attachments are as specific and impactful as the physical environment. This volume thus sheds important light on the various lenses used by people in the Middle Ages and the early modern age as to how they came to terms with their perceptions, images, and notions. Previous scholarship focused heavily on the history of mentality and history of emotions, whereas</p>

Aufgabenstellung, Lösung und Lösungshinweise werden integriert und vollständig mit wichtigen Erläuterungen dargestellt. Systematisch und produktorientiert behandeln die Aufgaben Baugruppen, in denen auch verschiedene miteinander zusammenwirkende Maschinenelemente behandelt werden. Die Aufgaben sind praxisnah formuliert, was sich z.B. auch in der zeichnerischen Darstellung der konstruktiven Situation und der Ergänzung der Aufgaben durch in der Praxis verfügbare Informationen zur Lösung der Aufgaben äußert.</p>

<p>Lost and Living (In) Archives: Collectively Shaping New Memories-Annet Dekker 2017-11-21 An archive is a collection of documents and records that is preserved for historical purposes. As such, an archive is considered a site of the past, a place that contains traces of a collective memory of a nation, a people or a group. Digital archives have changed from stable entities into flexible systems, referred to with the term ?Living Archives?. But in which ways has this change affected our relationship to the past, present and future? Will the erased, forgotten and neglected be redeemed, and new memories be allowed? Will the fictional versus factual mode of archiving offer the democracy that the public domain implies, or is it another way for public instruments of power to operate? 'Lost and Living (in) Archives' shows that an archive is not simply a recording, a reflection, or an image of an event, but that it shapes the event itself and thus influences both present and past.</p>

<p>Biomimetics in Architecture-petra gruber 2011-02-24 The purpose of investigating the overlaps between architecture and biology is neither to draw borders or make further distinctions nor to declare architecture alive, but to clarify what is currently happening in the blurred fields, and to investigate the emerging discipline of „biomimetics in architecture" [Architekturbionik]. An overview of the present state of research in the relatively young scientific field of biomimetics shows the potential of the approach. The new discipline aims at innovation by making use of the subtle systems and solutions in nature having evolved within millions of years. Approaches that have been taken to transfer nature's principles to architecture have provided successful developments. The new approach presented in this book transfers the abstract concept of life onto built environment. Strategic search for life's criteria in architecture delivers a new view of architectural achievements and makes the innovative potential visible, which has not been exploited yet. A selection of case studies illustrates the diversity of starting points: from vernacular architecture to</p>

here the history of pre-modern imagination, and fantasy assumes center position. Imaginary things are taken seriously because medieval and early modern writers and artists clearly reveal their great significance in their works and their daily lives. This approach facilitates a new deep-structure analysis of pre-modern culture.

French Leave-Anna Gavalda 2019 In French Leave four siblings are reunited one afternoon after skipping out on a dull family wedding. They leave behind needy spouses, annoying relatives, and the dull demands of encroaching adulthood for one final, riotous and joyous adventure in each other's company. Garance, her sister Lola, brother Simon and his overbearing wife are driving through the French countryside on their way to a family wedding in Podunk-on-Indre. Once they arrive and discover the real occasion to celebrate is the fact that they are together again, the three siblings realize what they really want to do is visit their youngest brother Vincent, who is working as a tour guide at a château in the heart of the enchanting province of Touraine. The siblings jump back in their car and race away, then talk Vincent into playing hooky in order to all hang out like they used to. For the remainder of that afternoon, over drinks and delicious food at a campsite where Vincent lives, the four siblings lose themselves in the laughter of inside jokes, teasing and memories that unite them. As simply and as spontaneously as the adventure began, it ends with each returning back to their respective lives, but with a new welcoming of the years ahead. Getting its title from the phrase meaning to take one's leave suddenly, with no warning and without permission, French Leave is full of feeling and a wonderful treat of a novel that captures a final moment of youth between a group of brothers and sisters before life truly gets in the way.

The Minimum Dwelling-Karel Teige 2002 Teige envisioned the minimum dwelling not as a reduced version of a bourgeois apartment or rural cottage, but as a wholly new dwelling type built with the cooperation of architects, sociologists, economists, health officials, physicians, social workers, politicians, and trade unionists."
