Life 2.0-Rich Karlgaard 2004-07-27 "A delightful, and surprisingly moving, tale" -- Michael Lewis, bestselling author of Moneyball "Karlgaard flies in with a companion concept to David Brooks's On Paradise Drive" -- Tom Wolfe "While counterintuitive to those on the conventional fast-track, Life 2.0 offers great promise to those who are open to personal innovation" -- Clayton Christensen, Professor, Harvard Business School "This fascinating treatise will make you think deeply, and may just give you the impetus to uproot" -- Tom Peters "An original and exhilarating look at options many Americans don't realize are now open to them." -- James Fallows, national correspondent, The Atlantic Monthly "Not only will it widen the horizons of your life, it could also renew your health and wealth." -- George Gilder Have You Found the Where of Your Happiness? One of the intriguing things about the United States is the idea of the second chance, that when you feel stuck there is always a frontier you can cross to reinvent yourself. In Life 2.0, Rich Karlgaard used his own personal and professional midlife crises to look at the state of the American dream—the belief in continuous personal upward mobility—and where it stands in the twenty-first century. At the ripe old age of forty-five, Karlgaard fell in love with flying and mastered the art of lifting up and bringing down a "2,500-pound aluminum box kite"—a four-seat single-engine airplane. As the publisher of Forbes he felt that he was doing too much armchair theorizing and didn't really understand how Americans were responding to the changes that had started taking place so swiftly over the past few years. So he put together his new flying skills and reportorial mission and flew around America to places like Green Bay, Wisconsin; Bozeman, Montana; Fargo, North Dakota; Des Moines, Iowa; and Lake Placid, New York, to gain some insight into how ordinary

Americans are untangling the knotty problems of constant stress, crushing expense, and bewildering hassle that often characterize life in the nation's urban centers. He discovered their simple solution: they moved. What Karlgaard found on the road are fascinating and inspiring stories about people— those with a nose for entrepreneurship, a faith in technology, and the willingness to take a chance— who are finding the new American dream in places as far from New York City and Silicon Valley as you can imagine. Some of those people include: • A burned-out insurance exec who fled his overworked East Coast life and settled in tranquil (yet dynamic) Des Moines • A tool broker who traded his brick-and-mortar business in sunny California for a life in the Pennsylvania hills, where he relaunched his business on the Internet • A road-warrior democracy specialist who conducts her worldly affairs from the low-key outpost of Bismarck, North Dakota • A self-made millionaire who paid for his financial success with his first marriage and who did things differently the second time around by moving to smaller cities and focusing on family as well as work Adroitly combining analysis of the economic and social trends challenging middle-class people with perceptive advice on how to escape the rat race of the coasts, Karlgaard explores the eye-opening possibilities of that huge tract of land often carelessly dubbed "flyover country." Filled with stories of personal reinvention and triumph, Life 2.0 is the story of those who are living larger lives in smaller places.

The Coming Crisis-Institute for Defense Analyses 2000 How will continued proliferation of nuclear weapons change the global political order? This collection of essays comes to conclusions at odds with the conventional wisdom. Stephen Rosen and Barry Posen explore how nuclear proliferation may affect US incentives to confront regional aggression. Stephen Walt argues that regional allies will likely prove willing to stand with a strong and ready United States against nuclear-backed aggression. George Quester and Brad Roberts examine long-term strategic objectives in responding to nuclear attack by a regional aggressor. Richard Betts highlights the potential for disastrous mistakes in moving toward and living in a world heavily populated with nuclear-armed states. Scott Sagan explores how the nuclear nonproliferation policies best suited to some states can spur proliferation by others. Caroline Ziemke shows how the analysis of a state's strategic personality can provide insights into why it might want nuclear weapons and how its policies may develop once it gets them. And, Victor Utgoff concludes that the United States seems more likely to intervene against regional aggression when the aggressor has nuclear weapons than when it does not.
