**Digital Satellite Communications**-Tri T. Ha 1990-05-01

**Satellite Communications**-Timothy Pratt 1986 The only work to present a unified treatment of all the basic aspects of satellite communications and to give practical examples from real systems. Whereas most texts in the field concentrate on a mathematical description of the communications link, Satellite Communications gives the reader a thorough knowledge of the subject by going on to cover orbits, propagation, and the equipment that comprises a working system. Pratt and Bostian go beyond the standard treatment of ideal channels (which ignores some very real practical limitations) to deal with the problems associated with transmitting digitally modulated signals through real satellites and earth stations. Included are chapters on orbital mechanics, spacecraft construction, satellite-path radio wave propagation, modulation techniques, multiple access, and a detailed analysis of the communications link. Contains worked examples and homework problems based on current industrial practice.

**Cells to Civilizations**-Enrico Coen 2015-03-22 Coen describes the four ways that life, in the broadest term, is transformed: development through patterning, Darwinian selection, modifying neural interactions and connections, and cultural change as a result of human behavior and interaction; and argues that these four means of transformation are better understood not as separate processes, but as one common set of mechanisms for life's transformations.

**Conceptualising Community**-D. Studdert 2005-12-06 Community is the dark shadow of sociology - an issue around which sociologists always duck and dive. This book examines the reasons for this reticence through an exegesis of contemporary debates. Additionally it utilizes the work of Hannah Arendt to propose an alternative anti-mechanistic and anti-essentialist approach to community and sociality; an approach that not only moves beyond Foucault and his oppositional work but also offers perhaps the basis for a different approach to politics.

**Combustion**-Irvin Glassman 2014-12-02 Throughout its previous four editions, Combustion has made a very complex subject both enjoyable and understandable to its student readers and a pleasure for instructors to teach. With its clearly articulated physical and chemical processes of flame combustion and smooth, logical transitions to engineering applications, this new edition continues that tradition. Greatly expanded end-of-chapter problem sets and new areas of combustion engineering applications make it even easier for students to grasp the significance of combustion to a wide range of engineering practice, from transportation to energy generation to environmental impacts. Combustion engineering is the study of rapid energy and mass transfer usually through the common physical phenomena of flame oxidation. It covers the physics and chemistry of this process and the engineering applications—including power generation in internal combustion automobile engines and gas turbine engines. Renewed concerns about energy efficiency and fuel costs, along with continued concerns over toxic and particulate emissions, make this a crucial area of engineering. New chapter on new combustion concepts and technologies, including discussion on nanotechnology as related to combustion, as well as microgravity combustion, microcombustion, and catalytic combustion—all interrelated and discussed by considering scaling issues (e.g., length and time scales) New information on sensitivity analysis of reaction mechanisms and generation and application of reduced mechanisms Expanded coverage of turbulent reactive flows to better illustrate real-world applications Important new sections on stabilization of diffusion flames—for the first time, the concept of triple flames will be introduced and discussed in the context of diffusion flame stabilization

**Compassionate Communalism**-Melani Cammett 2014-04-22 In Lebanon, religious parties such as Hezbollah play a critical role in providing health care, food, poverty relief, and other social welfare services alongside or in the absence of government efforts. Some parties distribute goods and services broadly, even to members of other parties or other faiths, while others allocate services more narrowly to their own base. In Compassionate Communalism, Melani Cammett analyzes the political logics of sectarianism through the lens of social welfare. On the basis of years of research into the varying welfare distribution strategies of Christian, Shia Muslim, and Sunni Muslim political parties in Lebanon, Cammett shows how and why sectarian groups deploy welfare benefits for such varied goals as attracting marginal voters, solidifying intraconfessional support, mobilizing mass support, and supporting militia fighters. Cammett then extends her arguments with novel evidence from the Sadrist movement in post-Saddam Iraq and the Bharatiya Janata Party in contemporary India, other places where religious and ethnic organizations provide welfare as part of their efforts to build political support. Nonstate welfare performs a critical function in the absence of capable state institutions, Cammett finds, but it comes at a price: creating or deepening social divisions, sustaining rival visions of the polity, or introducing new levels of social inequality. Compassionate Communalism is informed by Cammett's use of many methods of data collection and analysis, including Geographic Information Systems (GIS) analysis of the location of hospitals and of religious communities; a large national survey of Lebanese citizens regarding access to social welfare; standardized open-ended interviews with representatives from political parties, religious charities, NGOs, and government ministries, as well as local academics and journalists; large-scale proxy interviewing of welfare beneficiaries conducted by trained Lebanese graduate students matched with coreligionist respondents; archival research; and field visits to schools, hospitals, clinics, and other social assistance programs as well as political party offices throughout the country.

**Patterns of World History: Brief Third Edition, Volume One to 1600**-Peter Von Savers 2017 Encouraging a broad understanding of continuity, change, and innovation in human history, Patterns in World History presents the global past in a comprehensive, even-handed, and open-ended fashion. Instead of focusing on the memorization of people, places, and events, this text strives topresent important facts in context and draw meaningful connections by examining patterns that have emerged throughout global history.

**The Politics of Non-state Social Welfare**-Melani Cammett 2014-06-25 Across the world, welfare states are under challenge—or were never developed extensively in the first place—while non-state actors increasingly provide public goods and basic welfare. In many parts of the Middle East and South Asia, sectarian organizations and political parties supply basic services to ordinary people more extensively and effectively than governments. In sub-Saharan Africa, families struggle to pay hospital fees, and nongovernmental organizations (NGOs) launch welfare programs as states cut subsidies and social programs. Likewise, in parts of Latin America, international and domestic NGOs and, increasingly, private firms are key suppliers of social welfare in both urban and rural communities. Even in the United States, where the welfare state is far more developed, secular NGOs and faith-based organizations are critical components of social safety nets. Despite official entitlements to public welfare, citizens in Russia face increasing out-of-pocket expenses as they are effectively compelled to seek social services through the private market. In The Politics of Non-State Social Welfare, a multidisciplinary group of contributors use survey data analysis, spatial analysis, in-depth interviews, and ethnographic and archival research to explore the fundamental transformation of the relationship between states and citizens. The book highlights the political consequences of the non-state provision of social welfare, including the ramifications for equitable and sustainable access to social services, accountability for citizens, and state capacity. The authors do not assume that non-state providers will surpass the performance of weak, inefficient, or sometimes corrupt states but instead offer a systematic analysis of a wide spectrum of non-state actors in a variety of contexts around the world, including sectarian political parties, faith-based organizations, community-based organizations, family networks, informal brokers, and private firms.

**Break-up**-Joanna Walsh 2018-04-20 A novel in essays that locates a “romance” within the mesh of electronic communication. So I didn't call you: instead I posted a new avatar of myself without my habitual dark glasses. I have learned: an image, any image, is a blind. All avatars give different information, illusions of contact called Telepresence, none of them the real thing. You texted me, 3 am, from some station ... As though it made any difference. But it did. —from Break-Up In this “novel in essays,” Joanna Walsh simultaneously flees and pursues an ambiguous partner in an affair conducted mostly online. Traversing Europe, she awaits emails and texts and PMs, awash in her dreams, offering succinct meditations on connection and communication. If Marguerite Duras situated the telephone as the twentieth century's preferred hopeless form of connection, Walsh pinpoints the nodal points of a “romance” within today's mesh of electronic communication. As Deborah Levy observed recently, “Joanna Walsh is fast becoming one of our most important writers.” Her 2015 book Hotel, an investigation of transience conducted through hotel reviews, was described by The Paris Review as “a slim, sharp meditation on hotels and desires. [Walsh is] funny throughout, even as she documents the dissolution of her marriage and the peculiar brand of alienation on offer in lavish places.” Praise for Joanna Walsh “Walsh's writing has intellectual rigor and bags of formal bravery.” —The Financial Times “Hotel feels like something you want to endlessly quote: sharp, knowing, casually erudite. . . . there is power and an affecting gravitas in what Walsh does with detail.” —Sydney Review of Books “Walsh is a sublimely elegant writer ... artful and intelligent.” —The New Statesman

**Winter Brothers**-Ivan Doig 1982-10-20 A blend of modern-day travel memoir and nineteenth-century history, “infused with the fresh air and spirit of the Northwest” (The New York Times Book Review). The author of the acclaimed This House of Sky and Mountain Time provides a magnificent evocation of the Pacific Northwest through his exploration of the unpublished diaries of James Gilchrist Swan, an early settler of the region who was drawn there from Boston in the 1850s. Winter Brothers fuses excerpts from these diaries with author Ivan Doig's own journal entries, as he travels in Swan's footsteps one winter along the once-wild coastline of Puget Sound and the Strait of Juan de Fuca. What emerges is a remarkable interaction of two minds, a dialogue across time that links the present with the reality of the American frontier. “Absorbing . . . A double portrait of striking clarity, yet with wonderfully subtle hues.” —San Francisco Chronicle

**Becoming Critical Researchers**-Ernest Morrell 2004 Becoming Critical Researchers analyzes the findings of a two-year ethnographic study of the apprenticeship of urban youth as research researchers of popular culture. These changes include the acquisition and development of academic and critical literacies and the resulting translations of these literacies into increased academic performance, greater access to college, and commitment to social action. This book inserts critical and postmodern theory into the conception and evaluation of classroom practice and its findings suggest that programs centering on the lived experiences of teens can indeed achieve the goals of critical education, while also promoting academic achievement in urban schools.
