Best Kept Secret-Amy Hatvani 2011-06-07 A timely and captivating novel about a mother whose life spirals out of control when she descends into alcoholism, and her battle to get sober and regain custody of her beloved son. Cadence didn't sit down one night and decide that downing two bottles of wine was a brilliant idea. Her drinking snuck up on her—as a way to sleep, to help her relax after a long day, to relieve some of the stress of the painful divorce that's left her struggling to make ends meet with her five-year old son, Charlie. It wasn't always like this. Just a few years ago, Cadence seemed to have it all—a successful husband, an adorable son, and a promising career as a freelance journalist. But with the demise of her marriage, her carefully constructed life begins to spiral out of control. Suddenly she is all alone trying to juggle the demands of work and motherhood. Logically, Cadence knows that she is drinking too much, and every day begins with renewed promises to herself that she will stop. But within a few hours, driven by something she doesn't understand, she is reaching for the bottle—even when it means not playing with her son because she is too tired, or dropping him off at preschool late, again. And even when one calamitous night it means leaving him alone to pick up more wine at the grocery store. It's only when her ex-husband shows up at her door to take Charlie away that Cadence realizes her best kept secret has been discovered.... Heartbreaking, haunting, and ultimately life-affirming, Best Kept Secret is more than just the story of Cadence—it's a story of how the secrets we hold closest are the ones that can most tear us apart.

Teejay General Maths 4G-Tom Strang 2002-03-12 This book, along with General Book 3G covers in depth the entire contents of the General Course. It is also an invaluable resource which can easily be used to cover the outcomes of the new CFE National 4 course being introduced to Scottish schools. It is a pupil friendly book and is one of our biggest selling resources. We found that pupils who struggled with the complexities of other General resources on the market, and who found the sudden change of pace and the level of difficulty too great to cope with, felt a lot more comfortable with our 3G and 4G textbooks. In Book 3G, we truncated the work in some chapters, for example: Pythagoras - Hypotenuse only Circle work - Circumference only Trigonometry - Tangent only (Tan tables at back of book), in order to allow pupils to have access to these topics and feel confident with the work without burdening them with all the "tricky bits"! Though the missing topics from these chapters were covered in the Extension Materials in 3G, they are re-produced in this book with changed numbers.

They Cast No Shadows-Brian Desborough 2002-04-01 In this explosive and compelling book, author Brian Desborough explores the activities of the thirteen interconnected family bloodlines that collectively comprise the secret group known as the Illuminati. His years spent aiding survivors of Satanic ritual abuse and mind control has provided the author with an in-depth knowledge of Illuminati history and their future plans for the human race. The culmination of three decades of intensive research, this provocative book is designed to take readers out of their comfort zone and examine the historical and archaeological data, which reveal that: - Israel was created not by illiterate pastoralists, as is claimed by biblical scholars, but by skilled Kenite copper smelters. - The Dead Sea Scrolls were not written at Khirbat Qumran. - The Temple Mount is not the site of the Temples of Solomon and Herod. Applying a synthesis of history, politics, science and covert intelligence sources, the author explores such diverse subjects as mind control, advanced energy systems, terrestrially constructed flying saucers, extraterrestrials, and the planned double-cross of the western Illuminati factions by China and Russia. Oriented toward both the scholar and layperson, this revealing book is a "must read" for those interested in history, politics or high technology.

Now, ten years later, he has come home to the Gold Coast, that stretch of land on the North Shore of Long Island that once held the greatest concentration of wealth and power in America, to attend the imminent funeral of an old family servant. Taking up temporary residence in the gatehouse of Stanhope Hall, John finds himself living only a quarter of a mile from Susan who has also returned to Long Island. But Susan isn't the only person from John's past who has reemerged: Though Frank Bellarosa, infamous Mafia don and Susan's ex-lover, is long dead, his son, Anthony, is alive and well, and intent on two missions: Drawing John back into the violent world of the Bellarosa family, and exacting revenge on his father's murderer--Susan Sutter. At the same time, John and Susan's mutual attraction resurfaces and old passions begin to reignite, and John finds himself pulled deeper into a familiar web of seduction and betrayal.
