Timothy's Game-Lawrence Sanders 2013-02-12 Wall Street private investigator Timothy Cone is back in this trio of novellas that plunge into the high-stakes worlds of insider trading, corporate espionage, and cold-blooded murder Timothy Cone works for an agency that provides "financial intelligence"—and often investigates murder and mayhem, too. In "Run, Sally, Run!," Timothy Cone investigates insider leaks in a New York investment banking house, and faces the ruthless Sally Steiner, who's willing to do anything to succeed in a man's world. "A Case of the Shorts" opens with a bang: The CEO of a powerful Wall Street firm is gunned down in his limo. Cone is dispatched, ostensibly to uncover evidence of industrial sabotage. But what he finds is a simmering hornet's nest of greed, passion, and betrayal. A Chinese food corporation on the New York Stock Exchange raises red flags in "One From Column A." When the elderly CEO of White Lotus employs Cone's company to investigate, Cone is soon tangling with kidnapping, extortion, and the Asian mafia, and it's hard to tell who's scamming whom.

Intracellular Parasitic Protozoa-Masamichi Aikawa 2012-12-02 Intracellular Parasitic Protozoa introduces the basic structure and classification of intracellular parasitic protozoa and the concept of parasitism. This book starts by discussing the concept of parasitism and the taxonomic background of various intracellular protozoan organisms. This is followed by a description of the relationships between intracellular protozoan and their host cells. Then, this book discusses the ultrastructure of cells and organisms, emphasizing cell morphology that serves as the primary basis of generalizations of the host cell-parasite relationships. It also presents the intracellular protozoa in several groups according to their probable taxonomic relationships and more obvious morphological similarities. Finally, this text describes protozoan fine structure, along with a brief discussion of their biological aspects. This book is ideal for researchers, teachers, and students who wish to gain more knowledge in parasitism caused by intracellular protozoa.

International Relations, Music and Diplomacy-Frédéric Ramel 2018-01-22 This volume explores the interrelation of international relations, music, and diplomacy from a multidisciplinary perspective. Throughout history, diplomats have gathered for musical events, and musicians have served as national representatives. Whatever political unit is under consideration (city-states, empires, nation-states), music has proven to be a component of diplomacy, its ceremonies, and its strategies. Following the recent acoustic turn in IR theory, the authors explore the notion of "musical diplomacies" and ask whether and how it differs from other types of cultural diplomacy. Accordingly, sounds and voices are dealt with in acoustic terms but are not restricted to music per se, also taking into consideration the voices (speech) of musicians in the international arena. Wood Technology and Processes Student Workbook-FEIRER 2005-01-11

The State at Work-Hans-Ulrich Derlien 2009-01-01 Representing the most extensive research on public employment, these two volumes explore the radical changes that have taken place in the configuration of national public services due to a general expansion of public employment that was followed by stagnation and decreases. Part-time employment and the involvement of women also increased as a component of the public sector and were linked to the most important growth areas such as the educational, health care and personal social services sectors. The two volumes that make up this study shed important insight on these changes. Volume 1 offers a unique internationally comparative multi-dimensional analysis of ten public service systems belonging to different families of major advanced western countries. It contains the most comprehensive and comparable quantitative analyses available anywhere of ten public service systems; Britain, New Zealand, Australia, Canada, the US, Germany, Spain, France, Denmark and Sweden. Volume 2 is a comprehensive analysis of the ten public service systems, with in-depth comparisons of the systems along eight dimensions including central-regional-local government employment proportions and the change of the services since the 1950s with respect to social composition (gender, minorities, elites, career groups). Scholars and professionals in the fields of public administration, politics and economics will find this two-volume compendium informative and practical.

Corrupt Cities- 2000 Much of the devastation caused by the recent earthquake in Turkey was the result of widespread corruption between the construction industry and government officials. Corruption is part of everyday public life and we tend to take it for granted. However, preventing corruption helps to raise city revenues, improve service delivery, stimulate public confidence and participation, and win elections. This book is designed to help citizens and public officials diagnose, investigate and prevent various kinds of corrupt and illicit behaviour. It focuses on systematic corruption rather than the free-lance activity of a few law-breakers, and emphasises practical preventive measures rather than purely punitive or moralistic campaigns.

Seven Levels of Glory-James A Durham 2013-06 The Lord has opened a season of increased manifestations of His Glory. In this season, He is doing amazing things and giving fresh new revelations of who He is and what He has planned for us. The Lord has issued a clear call for His disciples to move from glory to glory into the very image of our Lord Jesus! Are you ready for it? "But we all, with unveiled face, beholding as in a mirror the glory of the Lord, are being transformed into the same image from glory to glory, just as by the Spirit of the Lord." (2 Corinthians 3:18) James Durham: After serving as a pastor for more than 45 years, including 13 years as a pastor and church planter and almost 30 years as an active duty army Chaplain, James retired from the military at the rank of Colonel. In 2010, James and his wife, Gloria, retired from the pastoral ministry and moved to Columbia, South Carolina in order to write, teach seminars around the world, and mentor many spiritual sons and daughters. James is a graduate of Oklahoma State University with a Bachelor's Degree in Psychology; Perkins School of Theology, Southern Methodist University, Dallas, Texas with a Master's degree in Theology.

Math on Trial-Leila Schneps 2013-03-12 In the wrong hands, math can be deadly. Even the simplest numbers can become powerful forces when manipulated by journalists, politicians or other public figures, but in the case of the law your liberty—and your life—can depend on the right calculation. Math on Trial tells the story of ten trials in which mathematical arguments were used—and disastrously misused—as evidence. Despite years of math classes, most people (and most jurors) fail to detect even simple mathematical sophistry, resulting in such horrors as a medical expert's faulty calculation of probabilities providing the key evidence for a British mother's conviction for the murder of her two babies. The conviction was later overturned, but three years in prison took its toll—Sally Clark died of acute alcohol intoxication in March of 2007. Mathematicians Leila Schneps and Coralie Colmez use a wide range of examples, from a mid-19th-century dispute over wills that became a signal case in the forensic use of mathematics, to the conviction and subsequent exoneration of Amanda Knox, to show how the improper application of mathematical concepts can mean the difference between walking free and life in prison. The cases discussed include: -The Case of Amanda Knox (How a judge's denial of a second DNA test may have destroyed a chance to reveal the truth about Meredith Kercher's murder) -The Case of Joe Sneed (How a fabricated probability framed a son for his parents' grisly killing) -The Case of Sally Clark (How multiplying non-independent probabilities landed an innocent mother in jail for the murder of her children) -The Case of Janet Collins (How unjustified estimates combined with a miscalculated probability convicted an innocent couple of violent robbery) A colorful narrative of mathematical abuse featuring such characters as Charles Ponzi, Alfred Dreyfus, Hetty Green, and Oliver Wendell Holmes, Math on Trial shows that legal expertise isn't everything when it comes to proving a man innocent.

EU Consumer Law and Policy-Stephen Weatherill 2013-01-01 Acclaim for the first edition: As a whole, Stephen Weatherill crafts a detailed and wonderfully rich consideration of this dynamic issue and is a resource which practitioners in this area could ill do without. Weatherill's thorough and thoughtful insights with regard to these issues provide an important basis for understanding the complexities and vagaries of market integration in the EU Community. Peter G. Fitzgerald, Canadian Law Library Review Steve Weatherill provides an excellent thought-provoking account of EU consumer law and policy. It will be required reading for all those interested in this important subject. Paul Craig, St Johns College, Oxford, UK This is a characteristically excellent book by Steve Weatherill, combining incisive legal analysis of an important policy field with an authoritative and up-to-date account of the underlying legal and constitutional framework. Grainne de Burca, European University Institute, Italy This new edition of Stephen Weatherill's acclaimed book provides a comprehensive introduction to all facets of the EU's involvement in consumer law and policy. Consumers are expected to benefit from the EU's project of economic integration, enjoying wider choice and improved quality, and yet they need protection from the dangers

that flow from malfunctioning and unfair markets. The EU's consumer law and policy is an attempt to have the best of both worlds: a liberalised yet properly regulated trading space for Europe. This highly esteemed book, now in a brand new edition, provides a comprehensive and up-to-date introduction to the subject, explaining the evolution of consumer law and policy in the EU in terms of both legislative and judicial activity. The book also situates EU consumer law and policy within its broader social, political and economic context, providing a window to a range of wider issues (and tensions) relating to Union regulatory strategies and their effect on the member states. It concludes with a newly written examination of the relationship between EU and national initiatives of market regulation: symbiosis or disruption? A readable yet critically sound textbook, this fully updated edition will be indispensable for both postgraduate and undergraduate students of EU law. It will also appeal strongly to all academics, regulators and practising lawyers with an interest in EU trade law or indeed European law more generally.

Understanding E-Government in Europe-Paul G. Nixon 2010-01-04 This volume critically explores the contentions in the emerging debate surrounding new media technologies and the extent to which they are challenging traditional political and government models. Examining a range of citizen/government interactions which together form e-government in different contexts, this book assesses the potential of new media technologies to facilitate new institutional patterns for governance and participation, as experienced primarily, but not only, across Europe. Analysing a range of challenges spanning from those of a technological and conceptual nature to those of a more political and legal nature, the authors scrutinise the central policies at governmental and organisational levels and consider the following questions: Is society driving or responding to e-government and is it ready to cope with it? What implications does e-government have for the power/democracy relationship? Is the technology right for e-government? What is needed to ensure government services are delivered optimally? How is e-government perceived and is it trusted? How are the sensitive issues of identity, privacy and social inclusion dealt with? How are management and safety dealt with when one considers issues such as activism, cyberterrorism, biometrics, and new implications for international relations? This comprehensive text will be of interest to students and scholars of public policy, politics, media and communication studies, sociology, law and European studies. It will also offer insights of relevance to practitioners and policy-makers in regional, national, and transnational governance, reform and innovation.

Balkan Family Structure and the European Pattern-Maria N. Todorova 2006-05-10 This study, which is an updated, extended, and revised version of the out-of-print 1993 edition, reassesses the traditional stereotype of the place of the Balkans in the model of the European family in the nineteenth century on the basis of new source material and by synthesizing existing research. The work first analyzes family structure and demographic variables as they appear in population registers and other sources, and the impact of these findings on theoretical syntheses of the European family pattern. On most features, such as population structure, marriage and nuptiality, birth and fertility, death and mortality rates, family and household size and structure, as well as inheritance patterns, the Balkans show an enormous deal of internal variety. This variability is put in a comparative European context by matching the quantifiable results with comparable figures and patterns in other parts of Europe. The second section of the book is a contribution to the long-standing debate over the *zadruga*, the complex, collective, joint or extended family in the Balkans. Finally, the book considers ideology and mythology and the ways it has adversely affected scholarship on the family, and broadly on population history.

The Wildest Province-Roderick Bailey 2011-10-31 In 1943, small teams of elite British soldiers began parachuting into the mountains of Axis-occupied Albania. They were members of Britain's Special Operations Executive, and their task was to find and arm bands of local guerillas and harass the Axis as best they could. None had been to Albania before, or knew what awaited them. Trying to survive in extreme conditions and formidable terrain, these young Britons lived in constant danger of capture and death, and were plagued by illness, lice and frostbite. Casualties were appalling and most guerillas keener to kill each other than fight Italians and Germans. In his extraordinary new book, Roderick Bailey draws on interviews with survivors, long-hidden diaries and recently declassified files to tell the full story of this remarkable corner of SOE history and finally settle the question of whether or not British communists in SOE, perhaps even colleagues of the Cambridge spies, had conspired to betray British interests.
