**Sapiens**-Yuval Noah Harari 2015-02-10 New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be "human." One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history

and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

**Liquid Love**-Zygmunt Bauman 2013-05-03 This book is about the central figure of our contemporary, 'liquid modern' times - the man or woman with no bonds, and particularly with none of the fixed or durable bonds that would allow the effort of self-definition and self-assertion to come to a rest. Having no permanent bonds, the denizen of our liquid modern society must tie whatever bonds they can to engage with others, using their own wits, skill and dedication. But none of these bonds are guaranteed to last. Moreover, they must be tied loosely so that they can be untied again, quickly and as effortlessly as possible, when circumstances change - as they surely will in our liquid modern society, over and over again. The uncanny frailty of human bonds, the feeling of insecurity that frailty inspires, and the conflicting desires to tighten the bonds yet keep them loose, are the principal themes of this important new book by Zygmunt Bauman, one of the most original and influential social thinkers of our time. It will be of great interest to students and scholars in sociology and in the social sciences and humanities generally, and it will appeal to anyone interested in the changing nature of human relationships.

**Operation Massacre**-Rodolfo Walsh 2013-08-20 1956. Argentina has just lost its charismatic president Juan Perón in a military coup, and terror reigns across the land. June 1956: eighteen people are reported dead in a failed Peronist uprising. December 1956: sometime journalist, crime fiction writer, studiously unpoliticized chess aficionado Rodolfo Walsh learns by chance that one of the executed civilians from a separate, secret execution in June, is alive. He hears that there may be more than one survivor and believes this unbelievable story on the spot. And right there, the monumental classic Operation Massacre is born. Walsh made it his mission to find not only the survivors but widows, orphans, political refugees, fugitives, alleged informers, and anonymous heroes, in order to determine what happened that night, sending him on a journey that took over the rest of his life. Originally published in 1957, Operation Massacre thoroughly and breathlessly recounts the night of the execution and its fallout.

**The Conquest of America**-Tzvetan Todorov 1999 The Conquest of America is a fascinating study of cultural confrontation in the New World, with implications far beyond sixteenth-century America. The book offers an original interpretation of the Spaniards' conquest, colonization, and destruction of pre-Columbian cultures in Mexico and the Caribbean. Using sixteenth-century sources, the distinguished French writer and critic Tzvetan Todorov examines the beliefs and behavior of the Spanish conquistadors and of the Aztecs, adversaries in a clash of cultures that resulted in the near extermination of Mesoamerica's Indian population.

**A Return to the Village**-Francisco Ferreira 2017-02-28 This edited volume brings together several scholars who have produced outstanding ethnographies of Andean communities, mostly in Peru but also in neighbouring countries. These ethnographies were published between the 1970s and 2000s, following different theoretical and thematic approaches, and they often transcended the boundaries of case studies to become important reference works on key aspects of Andean culture: for example, the symbolism and ritual uses of coca in the case of CatherineJ. Allen; agricultural rituals and internal social divisions in the case of Peter Gose; social organisation and kinship in the case of Billie Jean Isbell; the use of khipus and concepts of literacy in the case of Frank Salomon; and the management and ritual dimensions of water and irrigation in the case of Ricardo Valderrama and Carmen Escalante. In their chapters the authors revisit their original works in the light of contemporary anthropology, focusing on different academic and personal aspects of their ethnographies. For example, they explain how they chose the communities they worked in; the personal relations they established there during fieldwork; the kind of links they have maintained; and how these communities have changed over time. They also review their original methodological and theoretical approaches and findings, reassessing their validity and explaining how their views have evolved or changed since they originally conducted their fieldwork and published their studies. This book also offers a review of the evolution and role of community ethnographies in the context of Andean anthropology. These ethnographies had a significant influence between the 1940s and 1980s, when they could be roughly divided--following Olivia Harris--between 'long-termist' and 'short-termist' approaches, depending on predominant focuses on historical continuities or social change respectively. However, by the 1990s these works came to be widely considered as too limited and subjective in the context of wider academic changes, such as the emergence of postmodern trends, and reflective and literary turns in anthropology. Overall, the book aims to reflect on this evolution of community ethnographies in the Andes, and on their contribution to the study of Andean culture.

**Information Economy Report 2015**-United Nations Conference on Trade and Development (UNCTAD) 2015-06-19 Electronic commerce (e-commerce) is rapidly transforming the way in which enterprises are interacting among each other as well as with consumers and governments. Despite important potential benefits, businesses and consumers in developing countries were for a long time slow to exploit e-commerce. As a result of changes in the evolving landscape for information and communications technologies (ICTs), this pattern is now changing, and e-commerce is growing rapidly in emerging markets and developing economies. Against this background, this publication revisits the potential opportunities and risks of e-commerce and examines how countries can benefit the most from the phenomenon in today's Information Society. Using official statistics and private sector data, it provides an up-to-date review of global and regional trends related to e-commerce in view of changes in the ICT landscape, focusing on developing countries while drawing lessons from developed countries.

**Age Of Capital: 1848-1875**-Eric Hobsbawm 2010-12-16 A magisterial account of the rise of capitalism Eric Hobsbawm's magnificent treatment of the crucial years 1848-1875 is a penetrating analysis of the rise of capitalism and the consolidation of bourgeois culture. In the 1860s a new word entered the economic and political vocabulary of the world: 'capitalism'. The global triumph of capitalism is the major theme of history in the decades after 1848. The extension of capitalist economy to four corners of the globe, the mounting concentration of wealth, the migration of men, the domination of Europe and European culture made the third quarter of the nineteenth century a watershed. This is a history not only of Europe but of the world. Eric Hobsbawm's intention is not to summarise facts, but to draw facts together into a historical synthesis, to 'make sense of' the period, and to trace the roots of the present world back to it. He integrates economics with political and intellectual

developments in this objective yet original account of revolution and the failure of revolution, of the cycles of boom and slump that characterise capitalist economies, of the victims and victors of the bourgeois ethos.

**Transplanting International Courts**-Karen J. Alter 2017-04-06 Transplanting International Courts provides a deep, systematic investigation of the most active and successful transplant of the European Court of Justice. The Andean Tribunal is effective by any plausible definition of the term, but only in the domain of intellectual property law. Alter and Helfer explain how the Andean Tribunal established its legal authority within and beyond this intellectual property island, and how Andean judges have navigated moments of both transnational political consensus and political contestation over the goals and objectives of regional economic integration. By letting member states set the pace and scope of Andean integration, by condemning unequivocal violations of Andean rules, and by allowing for the coexistence of national legislation and supranational authority, the Tribunal has retained its fidelity to Andean law while building relationships with nationally-based administrative agencies, lawyers, and judges. Yet the Tribunal's circumspect and formalist approach means that, unlike in Europe, Community law is not an engine of integration. The Tribunal's strategy has also limited its influence within the Andean legal system. Transplanting International Courts also revisits the authors' path-breaking scholarship on the effectiveness of international adjudication. Alter and Helfer argue that the European Court of Justice benefitted in underappreciated ways from the support of jurist advocacy movements that are absent or poorly organized in the Andes and elsewhere in the world. The Andean Tribunal's longevity despite these and other challenges offers guidance for international courts in other developing country contexts. Moreover, given that the Andean Community has weathered member state withdrawals and threats of exit, major economic and political crises, and the retrenchment of core policies such as the common external tariff, the Andean experience offers timely and important lessons for Europe's international courts.

**Politics on the Edges of Liberalism: Difference, Populism, Revolution, Agitation**-Benjamin Arditi 2007-01-10 An innovative exploration of ways of thinking and doing politics that challenge liberal assumptions. 'Politics on the edges of liberalism' refers to a grey zone where phenomena such as difference, populism, revolution and agitation turn the distinction between the inside and the outside of liberalism into a matter of dispute. Each chapter takes on one of these ideas, discussing the intellectual background animating the politics of the culture wars and its celebration of particularism over the universalism of classical liberal thought. Populism becomes a spectral recurrence rather than an outside of democracy. Agitation reappears in emancipatory politics, and the idea of revolution is thought through outside the Jacobin view of insurrection, overthrow and total re-foundation. This is truly interdisciplinary inquiry at the cutting edge of contemporary debates in politics, critical theory, philosophy and sociology. The author draws from an impressive range of thinkers such as Kant, Benjamin, Derrida, Freu

**Democracies and Dictatorships in Latin America**-Scott Mainwaring 2014-01-31 This book presents a new theory for why political regimes emerge, and why they subsequently survive or break down. It then analyzes the emergence, survival and fall of democracies and dictatorships in Latin America since 1900. Scott Mainwaring and Aníbal Pérez-Liñán argue for a theoretical approach situated between long-term structural and cultural explanations and short-term explanations that look at the decisions of specific leaders. They focus on the political preferences of powerful actors - the degree to which they embrace democracy as an intrinsically desirable end and their policy radicalism - to explain regime outcomes. They also demonstrate that transnational forces and influences are crucial to understand regional waves of democratization. Based on extensive research into the political histories of all twenty Latin American countries, this book offers the first extended analysis of regime emergence, survival and failure for all of Latin America over a long period of time.

**Apocalypse Postponed**-Umberto Eco 2000-11 An erudite and witty collection of Umberto Eco's essays on mass culture from the 1960s through the 1980s, including major pieces which have not been translated into English before. The discussion is framed by opposing characterizations of current intellectuals as apocalyptic and opposed to all mass culture, or as integrated intellectuals, so much a part of mass culture as to be unaware of serving it. Organized in four main parts, "Mass Culture: Apocalypse Postponed," "Mass Media and the Limits of Communication," "The Rise and Fall of Counter-Cultures," and "In Search of Italian Genius," Eco looks at a variety of topics and cultural productions, including the world of Charlie Brown, distinctions between highbrow and lowbrow, the future of literacy, Chinese comic strips, whether countercultures exist, Fellini's Ginger and Fred, and the Italian genius industry.

**Ugly Stories of the Peruvian Agrarian Reform**-Enrique Mayer 2009-01-01 Ugly Stories of the Peruvian Agrarian Reform reveals the human drama behind the radical agrarian reform that unfolded in Peru during the final three decades of the twentieth century. That process began in 1969, when the left-leaning military government implemented a drastic program of land expropriation. Seized lands were turned into worker-managed cooperatives. After those cooperatives began to falter and the country returned to civilian rule in the 1980s, members distributed the land among themselves. In 1995-96, as the agrarian reform process was winding down and neoliberal policies were undoing leftist reforms, the Peruvian anthropologist Enrique Mayer traveled throughout the country, interviewing people who had lived through the most tumultuous years of agrarian reform, recording their memories and their stories. While agrarian reform caused enormous upheaval, controversy, and disappointment, it did succeed in breaking up the unjust and oppressive hacienda system. Mayer contends that the demise of that system is as important as the liberation of slaves in the Americas. Mayer interviewed ex-landlords, land expropriators, politicians, government bureaucrats, intellectuals, peasant leaders, activists, ranchers, members of farming families, and others. Weaving their impassioned recollections with his own commentary, he offers a series of dramatic narratives, each one centered around a specific instance of land

expropriation, collective enterprise, and disillusion. Although the reform began with high hopes, it was quickly complicated by difficulties including corruption, rural and urban unrest, fights over land, and delays in modernization. As he provides insight into how important historical events are remembered, Mayer re-evaluates Peru's military government (1969-79), its audacious agrarian reform program, and what that reform meant to Peruvians from all walks of life.

**Rethinking Latin America**-R. Munck 2013-03-20 In a subtle but powerful reading of the shifting relationships between development, hegemony, and social transformation in post-independence Latin America, Ronaldo Munck argues that Latin American subaltern knowledge makes a genuine contribution to the current search for a social order which is sustainable and equitable.

**A Testament of Hope**-Martin Luther King 1990-12-07 "We've got some difficult days ahead," civil rights activist Martin Luther King, Jr., told a crowd gathered at Memphis's Clayborn Temple on April 3, 1968. "But it really doesn't matter to me now because I've been to the mountaintop. . . . And I've seen the promised land. I may not get there with you. But I want you to know tonight that we as a people will get to the promised land." These prophetic words, uttered the day before his assassination, challenged those he left behind to see that his "promised land" of racial equality became a reality; a reality to which King devoted the last twelve years of his life. These words and other are commemorated here in the only major one-volume collection of this seminal twentieth-century American prophet's writings, speeches, interviews, and autobiographical reflections. A Testament of Hope contains Martin Luther King, Jr.'s essential thoughts on nonviolence, social policy, integration, black nationalism, the ethics of love and hope, and more.

**Mad Maria**-Márcio Souza 2005 Márcio Souza tem recontado a história do Brasil de forma admirável ao longo de sua carreira. Seguindo os passos de Galvez, o imperador do Acre, MAD MARIA é mais um romance memorável do escritor. A Editora Record está relançando toda a obra do escritor recomposta e com novo projeto gráfico. MAD MARIA, escrito em 1980, é o segundo livro de Souza e a narrativa transcorre no interior da Amazônia. O livro relata a construção da ferrovia Madeira-Mamoré, entre 1907 e 1912. Na época os investidores tinham o objetivo de construir uma estrada que pudesse competir com o Canal do Panamá. A ferrovia integraria uma região rica em látex na Bolívia com a Amazônia, mas no caminho, encontraria obstáculos descomunais: 19 cachoeiras, 227 milhas de pântanos e desfiladeiros, centenas de cobras e escorpiões, árvores gigantescas e milhões de mosquitos transmissores de malária. Antes de terminadas as obras, 3,6 mil homens estavam mortos, 30 mil hospitalizados e uma fortuna em dólares desperdiçada na selva. Ao escolher os episódios mais macabros e inacreditáveis dos registros históricos dos cinco anos da construção da ferrovia e concentrando-os em três meses de pesadelo, Márcio Souza força o leitor - neste momento já quase um personagem emaranhado na vegetação - a confrontar o inferno. MAD MARIA é um romance amargo e vingador, sarcástico, às vezes. Uma obra-prima da literatura brasileira. Márcio Souza nasceu em Manaus em 1946. Formado em Ciências Sociais pela USP, começou a vida profissional no cinema, como crítico, roteirista e diretor. Tem uma sólida carreira como dramaturgo, autor de peças como Ação entre amigos e Tem piranha no Pirarucu. Galvez Imperador do Acre marca a estréia literária em 1976. Sua carreira como escritor já conta com mais de vinte títulos, entre eles O fim do terceiro mundo, Lealdade, Desordem e Entre Moisés e Macunaíma. Desde 1995 é presidente da Funarte. "A ironia amarga de Márcio Souza germina diretamente do coração das trevas." The New York Times Book Review "Epopéia às avessas, romance notável de um Márcio Souza crescentemente mestre de seu ofício e transbordante de talento, Mad Maria é um faroeste à medida brasileira: sem ilusões, vigilante e pontiagudo como uma flecha na noite escura." Folha de São Paulo

**From #BlackLivesMatter to Black Liberation**-Keeanga-Yamahtta Taylor 2016-02-01 The author of Race for Profit carries out "[a] searching examination of the social, political and economic dimensions of the prevailing racial order" (Michelle Alexander, author of The New Jim Crow). In this winner of the Lannan Cultural Freedom Prize for an Especially Notable Book, Keeanga-Yamahtta Taylor "not only exposes the canard of color-blindness but reveals how structural racism and class oppression are joined at the hip" (Robin D. G. Kelley, author of Freedom Dreams). The eruption of mass protests in the wake of the police murders of Michael Brown in Ferguson, Missouri, and Eric Garner in New York City have challenged the impunity with which officers of the law

carry out violence against black people and punctured the illusion of a post-racial America. The Black Lives Matter movement has awakened a new generation of activists. In this stirring and insightful analysis, activist and scholar Keeanga-Yamahtta Taylor surveys the historical and contemporary ravages of racism and the persistence of structural inequality, such as mass incarceration and black unemployment. In this context, she argues that this new struggle against police violence holds the potential to reignite a broader push for black liberation. "This brilliant book is the best analysis we have of the #BlackLivesMatter moment of the long struggle for freedom in America. Keeanga-Yamahtta Taylor has emerged as the most sophisticated and courageous radical intellectual of her generation." —Dr. Cornel West, author of *Race Matters* "A must read for everyone who is serious about the ongoing praxis of freedom." —Barbara Ransby, author of *Ella Baker and the Black Freedom Movement* "[A] penetrating, vital analysis of race and class at this critical moment in America's racial history." —Gary Younge, author of *The Speech: The Story Behind Dr. Martin Luther King Jr.'s Dream*

**Group Psychology and the Analysis of the Ego**-Sigmund Freud 1959 The contrast between Individual Psychology and Social or Group Psychology, which at a first glance may seem to be full of significance, loses a great deal of its sharpness when it is examined more closely. It is true that Individual Psychology is concerned with the individual man and explores the paths by which he seeks to find satisfaction for his instincts; but only rarely and under certain exceptional conditions is Individual Psychology in a position to disregard the relations of this individual to others. In the individual's mental life someone else is invariably involved, as a model, as an object, as a helper, as an opponent, and so from the very first Individual Psychology is at the same time Social Psychology as well. In this extended but entirely justifiable sense of the words. The relations of an individual to his parents and to his brothers and sisters, to the object of his love, and to his physician. In fact all the relations which have hitherto been the chief subject of psycho-analytic research may claim to be considered as social phenomena; and in this respect they may be contrasted with certain other processes, described by us as 'narcissistic', in which the satisfaction of the instincts is partially or totally withdrawn from the influence of other people. The contrast between social and narcissistic. Bleuler would perhaps call them 'autistic'. Mental acts therefore falls wholly within the domain of Individual Psychology, and is not well calculated to differentiate it from a Social or Group Psychology.

**The Self-restraining State**-Andreas Schedler 1999 This text states that democratic governments must be

accountable to the electorate; but they must also be subject to restraint and oversight by other public agencies. The state must control itself. This text explores how new democracies can achieve this goal.

**Tweets and the Streets**-Paolo Gerbaudo 2012-10-30 *Tweets and the Streets* analyses the culture of the new protest movements of the 21st century. From the Arab Spring to the "indignados" protests in Spain and the Occupy movement, Paolo Gerbaudo examines the relationship between the rise of social media and the emergence of new forms of protest. Gerbaudo argues that activists' use of Twitter and Facebook does not fit with the image of a "cyberspace" detached from physical reality. Instead, social media is used as part of a project of re-appropriation of public space, which involves the assembling of different groups around "occupied" places such as Cairo's Tahrir Square or New York's Zuccotti Park. An exciting and invigorating journey through the new politics of dissent, *Tweets and the Streets* points both to the creative possibilities and to the risks of political evanescence which new media brings to the contemporary protest experience.

**Violence**-Slavoj Žižek 2008 The premise of Zizek's theory is that the subjective violence we see - violence with a clear identifiable agent - is only the tip of an iceberg made up of 'systemic' violence, which is essentially the catastrophic consequence of the smooth functioning of our economic and political systems. With the help of Marx, Engels, Sartre, Hegel, Kierkegaard, Lacan, Brecht and many more, Zizek examines the hidden causes of violence, delving into the supposed 'divine violence' which propels suicide bombers and the unseen 'systemic' violence which lies behind outbursts, from Parisian suburbia to New Orleans. For Zizek, the controversial truth is that sometimes doing nothing is the most violent thing you can do. He calls for a forceful confrontation with the vacuity of today's democracies - using an unconventional plethora of references: Hitchcock, Orwell, Fukuyama, Freud and more.
