**Globalization and Its Discontents**-Joseph E. Stiglitz 2003-04-17 This powerful, unsettling book gives us a rare glimpse behind the closed doors of global financial institutions by the winner of the 2001 Nobel Prize in Economics. When it was first published, this national bestseller quickly became a touchstone in the globalization debate. Renowned economist and Nobel Prize winner Joseph E. Stiglitz had a ringside seat for most of the major economic events of the last decade, including stints as chairman of the Council of Economic Advisers and chief economist at the World Bank. Particularly concerned with the plight of the developing nations, he became

increasingly disillusioned as he saw the International Monetary Fund and other major institutions put the interests of Wall Street and the financial community ahead of the poorer nations. Those seeking to understand why globalization has engendered the hostility of protesters in Seattle and Genoa will find the reasons here. While this book includes no simple formula on how to make globalization work, Stiglitz provides a reform agenda that will provoke debate for years to come. Rarely do we get such an insider's analysis of the major institutions of globalization as in this penetrating book. With a new foreword for this paperback edition.

**Women in Business**-Paola Demartini 2019 [The role of women in entrepreneurship, management and corporate governance is regarded as central to the development and welfare of economies. Since the early 1980s, there has been increased interest in women managers and entrepreneurs, often from an interdisciplinary approach, combining, for example, sociology, psychology, management and organisational studies and economics. Nowadays, research on women in management and organisations is continuously and rapidly evolving (Paoloni and Demartini, 2016). Research on how women face new business challenges within organisations--as entrepreneurs, owners, managers, as well as workers--can contribute to understanding the new drivers affecting value creation dynamics in our knowledge-based society (Cesaroni, Demartini and Paoloni, 2017). Accordingly, this book tries to offer some insights on how women create, process and share knowledge in their business activity through the application and exploitation of novel creative ideas and solutions].

The second perspective relates to transnational criminal investigations and proceedings, which are seen as a cross section of the current state of judicial cooperation in the area of freedom, security and justice, with the related issues of efficiency, coordination, settlement of conflicts of jurisdiction, and guarantees. **Cultural Economics**-Ruth Towse 2012-12-06 Cultural economics as a field of research involves two areas, culture and economy. These two areas have been traditionally regarded as each other's antithesis. However, the economic aspects of culture have increasingly become a matter of everyday reality for persons working in the cultural field. The economy of culture has always been in the focus of political interest. Political decisions concerning such priority areas as the development of regional institutions, support to the artists and cultural programmes for children and youth have important economic implications. This book deals with a range of topics in cultural economics. It contains original papers by economists working in the field from 15 different countries and covers a host of both theoretical and practical issues, covering the performing arts, arts markets and museums. It represents an up-to-date statement of the application of economic ideas to cultural questions.

**Career Guidance and Livelihood Planning across the Mediterranean**-Ronald G. Sultana 2017-05-12 Perhaps no other challenge preoccupies governments and citizens in the Mediterranean region than the mass unemployment of young people, many of who have invested in higher education in the hope that ability and effort lead to fulfilling lives. Transitions to independent adulthood are, however, frustratingly long drawn-out, and often jeopardised by labour markets that are neither youth-friendly nor meritocratic. While such challenges require structural responses at the macro-economic level, career education and guidance have an important role to play in addressing both the public and private good, and in furthering the social justice agenda. This volume provides a state-of-the-art review of career education and guidance in Southern Europe and the Middle East and North Africa Region, presenting a multi-faceted portrayal of the situation in each country as well as overviews of cross-cutting themes that are especially relevant to context, such as women's career development in the Arab states, job placement support for refugees, and the impact of faith on livelihood planning. "This book is a major achievement, focusing on a pivotal part of the world." - Tony Watts, Cambridge, UK "This book challenges career guidance to truly think in a contextual, localised, plural and dialogical way. In providing an opportunity for the South to speak on its own terms it helps renew the field through different ways of thinking and doing career guidance." - Marcelo Afonso Ribeiro, University of São Paulo, Brazil "This wonderful new book furnishes a way forward in helping people and communities establish practices that will support our natural striving for work that is decent, dignified, and meaningful." - David L. Blustein, Boston College, USA "This book is packed with fresh ideas based on lucid arguments that draw from a substantial evidence base. This work is essential reading." - Gideon Arulmani, The Promise Foundation, Bangalore, India "This publication is a must-read for every individual involved in policy, research and practice activities in the career guidance field." - Rènette du Toit, Independent Research Services, South Africa

**Cities And The Rise Of States In Europe, A.d. 1000 To 1800**-Director Center for Studies of Social Change and Professor of History and Sociology Charles Tilly 1994-11-17 The rise of large, powerful states in Europe after

1000 a.d. transformed life across the Continent and eventually through the whole world. The new European states disposed of unprecedented stores of capital and vast military capacities. In recent decades, scholars have often drawn general models of state formation from the European experience after 1700, then applied them with only partial success to other parts of the world. Although such studies of modern Europe improved on early theories of modernization and development, they failed to accommodate the varied ways in which city-states, empires, federations, centralized states, and other forms of government evolved and the pivotal role that cities played in the multiple paths to state formation. In a sweeping, original work detailing eight centuries of city-state relations, Charles Tilly, Wim P. Blockmans, and their contributors document differences in political trajectories from one part of Europe to another and provide authoritative surveys of urbanization in nine major regions; they also suggest many correctives to previous analyses of state formation. They show that the variable distribution of cities significantly and independently constrained state formation and that states grew differently according to the character of urban networks in a given region. Their systematic study shows that unilinear models of state transformation underestimate the contingency and variability of popular and elite compliance with state-building activities. The book's findings offer important implications for the nature of economy, sovereignty, warfare, state power, and social change throughout the world.
