Colloid Science-Terence Cosgrove 2010-05-10 Colloidal systems are important across a range of industries, such as the food, pharmaceutical, agrochemical, cosmetics, polymer, paint and oil industries, and form the basis of a wide range of products (eg cosmetics & toiletries, processed foodstuffs and photographic film). A detailed understanding of their formation, control and application is required in those industries, yet many new graduate or postgraduate chemists or chemical engineers have little or no direct experience of colloids. Based on lectures given at the highly successful Bristol Colloid Centre Spring School, *Colloid Science: Principles, Methods and Applications* provides a thorough introduction to colloid science for industrial chemists, technologists and engineers. Lectures

are collated and presented in a coherent and logical text on practical colloid science.

Richard Prince-Richard Prince 2008 Ilse

Zhalina is the daughter of one of Melnek's more prominent merchants. She has lived most of her life surrounded by the trappings of wealth and privilege. Many would consider hers a happy lot. But there are dark secrets, especially in the best of families. Ilse has learned that for a young woman of her beauty and social station, to be passive and silent is the best way to survive. When Ilse finally meets the older man she is to marry, she realizes he is far crueler and more deadly than her father could ever be. Ilse chooses to run. This choice will change her life forever. And it will lead her to Raul Kosenmark, master of one of the land's most notorious pleasure houses...and who is, as Ilse discovers, a puppetmaster of a different sort altogether. Ilse discovers a world where every pleasure has a price and there are levels of magic and intrigue she once thought unimaginable. She also finds the other half of her heart. *Passion Play* is Beth Bernobich's first novel.

The Substance of Style-Virginia Postrel
2009-03-17 Whether it's sleek leather pants, a shiny new Apple computer, or a designer toaster, we make important decisions as consumers every day based on our sensory experience. Sensory appeals are everywhere, and they are intensifying, radically changing how Americans live and work. The twenty-first century has become the age of aesthetics, and whether we realize it or not, this influence has taken over the marketplace, and much more. In this penetrating, keenly observed book, Virginia Postrel makes the argument that appearance counts, that aesthetic value is real. Drawing from fields as diverse as fashion, real estate, politics, design, and economics, Postrel deftly chronicles our culture's aesthetic imperative and argues persuasively that it is a vital component of a healthy, forward-looking society. Intelligent, incisive, and thought-provoking, *The Substance of Style* is a groundbreaking portrait of the democratization of taste and a brilliant examination of the way we live now.

Pathways to the Common Core-Lucy Calkins
2012 Lucy Calkins and her colleagues at the Reading and Writing Project have helped thousands of educators design their own pathways to the Common Core. Now, with *Pathways to the Common Core*, they are ready to help you find your way. Designed for teachers, school leaders, and professional learning communities looking to navigate the gap between their current literacy practices and the ideals of the Common Core, *Pathways to the Common Core* will help you: understand what the standards say, suggest, and what they don't say; recognize the guiding principles that underpin the reading and writing standards; identify how the Common Core's infrastructure supports a spiraling K-12 literacy curriculum; and scrutinize the context in which the CCSS were written and are being unrolled. In addition to offering an analytical study of the standards, this guide will also help you and your colleagues implement the standards in ways that lift the level of teaching and learning throughout your school.

Handmade in Japan-Gestalten 2020-03-31
Discover the exceptional artistry and rich traditions being kept alive by Japanese artisans in the twenty-first century. In an era where global interest in handmade, small-batch products is heightening as a response to mass production, *Handmade in Japan* takes a look inside the workshops of the country's artisans, revealing their endless pursuit of excellence, and what it means to dedicate one's life to the stewardship of irreplaceable cultural heritage. International readers with an appreciation for handmade processes using sustainable materials will find inspiration in the exploration of craft ecosystems, such as the harvesting of natural lacquer in Iwate. Likewise, those who admire skill and beauty will enjoy discovering the lengths these makers go to in ensuring every product is perfect.

Red Planet-Jill L. Haney 2014

Deadly Force-Jonathan Shapiro 2016 Deadly Force takes place in US Attorney's Office for the Central District of California, Santa Ana branch office, a desert outpost where a handful of federal prosecutors are responsible for enforcing the federal law of the U.S. for an area that is larger than 14 states, and has a population of more than 5 million people. Here is Lizzie Scott, a classic western hero for the 21st century. Follow her as she untangles an excessive force case against a cop, all while balancing agency turf battles, secret grand jury proceedings, inter-office rivalries and on-the-make prosecutors. If

she indicts the deputy, she faces death threats from the police, if she loses the case, a killer will go free and her career will be destroyed. It's the ultimate insiders look into the nuts-and-bolts of a federal civil rights prosecution, with fascinating legal and moral issues. "The best legal thriller since Presumed Innocent. Deadly Force offers a thought-provoking insider's look at the justice system and the people who operate it. A gripping page turner, nobody writes the law or lawyers better than Jonathan Shapiro." --David E. Kelley, Emmy Award-winning writer/producer of The Blacklist, The Practice, Boston Legal, and Ally McBeal"
