Drought characteristics and management in North Africa and the Near East-Food and Agriculture Organization of the United Nations 2018-06-19 The report assesses the occurrence and impacts of drought, the current policies underlying drought management as well as the mitigation measures and responses adopted in the Near East and North Africa region, with a focus on the Agriculture Sector. It is the third of a series of similar studies carried out in different regions and countries of the world, with the objective of shedding light on drought effects, sensitizing policy-makers for the much needed paradigm shift to pro-active drought management planning and providing guidance for the development of such policies. The studies are carried out by FAO, in collaboration with the Water for Food Institute, University of Nebraska-Lincoln, USA, as a direct contribution to FAO's Strategic Objective "increasing the resilience of livelihoods to disasters" and Strategic Objective "make agriculture, forestry and fisheries more productive and sustainable".

Free and Open Source Software (FOSS) and other Alternative License Models-Axel Metzger 2015-12-08 This book discusses the main legal questions raised by free and open source software (FOSS) licenses and other alternative license models, such as Creative Commons. The legal questions raised by FOSS and other alternative licenses have been the subject of an intense international debate among legal scholars and practising lawyers in the last years. Courts in different jurisdictions have confirmed that the core features of FOSS licenses are compliant with the respective applicable laws and thus enforceable in the respective jurisdictions. What is still missing so far is an in-depth comparative analysis of the legal issues raised by FOSS, Creative Commons and other alternative license on a worldwide scale. This book presents a general report on FOSS licenses and alternative license models to establish common ground and enable comparison between jurisdictions. The general report is followed by 24 national reports covering the world's most important IT-markets. General and national reports use the same structure to facilitate the comparison. The book shows that despite the differences in their origins, all FOSS projects use detailed licenses for the organisation of their communities. It also shows the differences in the proofing of these licenses by courts in some jurisdictions and the tailor-made provisions established by some legislators to solve the legal issues raised by the license model.

Hospital Performance in Brazil-Gerard Martin La Forgia 2008-01-01 Drawing on an eclectic array of research and evaluative studies culled from a mix of sources, this volume analyzes Brazilian hospital performance along several policy dimensions including resource allocation and use within hospitals, hospital payment mechanisms, organizational and governance arrangements, management practices, and regulation and quality. An agenda for hospital reform is proposed which synthesizes priorities that are integral to improving hospital performance-and which should be considered for implementation in the near and medium term.

Coviability of Social and Ecological Systems: Reconnecting Mankind to the Biosphere in an Era of Global Change-Olivier Barrière 2019-03-12 This book considers the principle of 'sustainable development' which is currently facing a growing environmental crisis. A new mode of thinking and positioning the ecological imperative is the major input of this volume. The prism of co-viability is not the economics of political agencies that carry the ideology of the dominant/conventional economic schools, but rather an opening of innovation perspectives through science. This volume, through its four parts, more than 40 chapters and a hundred authors, gives birth to a paradigm which crystallizes within a concept that will support in overcoming the ecological emergency deadlock.

GMAT Math Workbook-Ender Markal 2017-01-01 Students preparing to take the GMAT will find that this book gives the help they need to excel on the test's math section. Separate chapters review the fundamentals of arithmetic, algebra, and geometry. Another chapter gives special attention to the test's often-perplexing word problems, with advice on translating a problem's words into a specific equation. A final chapter focuses on the data sufficiency question type, which is new to many test takers. Every chapter in the book is filled with plenty of practice problems and detailed solutions. Two full-length model tests are included for further practice. The author also offers helpful advice on test preparation and test-taking tips and strategies.

Critical Theory and Authoritarian Populism-Jeremiah Morelock 2018-12-17 After President Trump's election, BREXIT and the widespread rise of far-Right political parties, much public discussion has intensely focused on populism and authoritarianism. In the middle of the twentieth century, members of the early Frankfurt School prolifically studied and theorized fascism and anti-Semitism in Germany and the United States. In this volume, leading European and American scholars apply insights from the early Frankfurt School to present-day authoritarian populism, including the Trump phenomenon and related developments across the globe. Chapters are arranged into three sections exploring different aspects of the topic: theories, historical foundations, and manifestations via social media. Contributions examine the vital political, psychological and anthropological theories of early Frankfurt School thinkers, and how their insights could be applied now amidst the insecurities and confusions of twenty-first century life. The many theorists considered include Adorno, Fromm, Löwenthal and

Marcuse, alongside analysis of Austrian Facebook pages and Trump's tweets and operatic media drama. This book is a major contribution towards deeper understanding of populism's resurgence in the age of digital capitalism.

Emergency Laparoscopy-Ferdinando Agresta 2016-05-26 This book provides up-to-date evidence on laparoscopic emergency surgery and supplies concrete advice on when and how to approach patients laparoscopically in an emergency setting. All the diseases eligible for emergency laparoscopy are addressed, and for each disease recommendations, levels of evidence, and technical key points are discussed and analyzed. Diagnostic flow charts are included for cases in which laparoscopy turns out to be the final diagnostic step and the first therapeutic one. Furthermore, problematic and positive aspects of the laparoscopic approach from the anesthesiologic point of view are fully explored. Finally, a useful overview of current practice in hospitals across the world is provided, highlighting the varying applications in relation to different medical "cultures", skills, resources, and healthcare systems.

Revisiting Risk-Weighted Assets-Vanessa Le Leslé 2012-03-01 In this paper, we provide an overview of the concerns surrounding the variations in the calculation of risk-weighted assets (RWAs) across banks and jurisdictions and how this might undermine the Basel III capital adequacy framework. We discuss the key drivers behind the differences in these calculations, drawing upon a sample of systemically important banks from Europe, North America, and Asia Pacific. We then discuss a range of policy options that could be explored to fix the actual and perceived problems with RWAs, and improve the use of risk-sensitive capital ratios.

Inequality in Education-Donald B. Holsinger 2009-05-29 Inequality in Education: Comparative and International Perspectives is a compilation of conceptual chapters and national case studies that includes a series of methods for measuring education inequalities. The book provides up-to-date scholarly research on global trends in the distribution of formal schooling in national populations. It also offers a strategic comparative and international education policy statement on recent shifts in education inequality, and new approaches to explore, develop and improve comparative education and policy research globally. Contributing authors examine how education as a process interacts with government finance policy to form patterns of access to education services. In addition to case perspectives from 18 countries across six geographic regions, the volume includes six conceptual chapters on topics that influence education inequality, such as gender, disability, language and economics, and a summary chapter that presents new evidence on the pernicious consequences of inequality in the distribution of education. The book offers (1) a better and more holistic understanding of ways to measure education inequalities; and (2) strategies for facing the challenge of inequality in education in the processes of policy formation, planning and implementation at the local, regional, national and global levels.

CONCORSOPOLI ED ESAMOPOLI-Antonio Giangrande E' comodo definirsi scrittori da parte di chi non ha arte né parte. I letterati, che non siano poeti, cioè scrittori stringati, si dividono in narratori e saggisti. E' facile scrivere "C'era una volta...." e parlare di cazzate con nomi di fantasia. In questo modo il successo è assicurato e non hai rompiballe che si sentono diffamati e che ti querelano e che, spesso, sono gli stessi che ti condannano. Meno facile è essere saggisti e scrivere "C'è adesso...." e parlare di cose reali con nomi e cognomi. Impossibile poi è essere saggisti e scrivere delle malefatte dei magistrati e del Potere in generale, che per logica ti perseguitano per farti cessare di scrivere. Devastante è farlo senza essere di sinistra. Quando si parla di veri scrittori ci si ricordi di Dante Alighieri e della fine che fece il primo saggista mondiale. Le vittime, vere o presunte, di soprusi, parlano solo di loro, inascoltati, pretendendo aiuto. Io da vittima non racconto di me e delle mie traversie. Ascoltato e seguito, parlo degli altri, vittime o carnefici, che l'aiuto cercato non lo concederanno mai. "Chi non conosce la verità è uno sciocco, ma chi, conoscendola, la chiama bugia, è un delinquente". Aforisma di Bertolt Brecht. Bene. Tante verità soggettive e tante omertà son tasselli che la mente corrompono. Io le cerco, le filtro e nei miei libri compongo il puzzle, svelando l'immagine che dimostra la verità oggettiva censurata da interessi economici ed ideologie vetuste e criminali. Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, riportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italici. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

Mozart's Last Aria-Matt Rees 2011-11-01 Award-winning author Matt Rees takes readers to 18th centuryAustria, where Mozart's estranged sister Nannerl stumblesinto a world of ambition, conspiracy, and immortal music while attempting touncover the truth about her brother's suspicious death. Physical Optics-Giovanni Giusfredi 2019-11-12 This textbook provides a sound foundation in physical optics by covering key concepts in a rigorous but accessible manner. Propagation of electromagnetic waves is examined from multiple perspectives, with explanation of which viewpoints and methods are best suited to different situations. After an introduction to the theory of electromagnetism, reflection, refraction, and dispersion, topics such as geometrical optics, interference, diffraction, coherence, laser beams, polarization, crystallography, and anisotropy are closely examined. Optical elements, including lenses, mirrors, prisms, classical and Fabry-Perot interferometers, resonant cavities, multilayer dielectric structures, interference and spatial filters, diffraction gratings, polarizers, and birefringent plates, are treated in depth. The coverage also encompasses such seldom-covered topics as modeling of general astigmatism via 4x4 matrices, FFT-based numerical methods, and bianisotropy, with a relativistic treatment of optical activity and the Faraday and Fresnel-Fizeau effects. Finally, the history of optics is discussed.

To Sir Phillip, With Love-Julia Quinn 2017-01-31 A New York Times Bestseller From #1 New York Times bestselling author Julia Quinn comes the story of Eloise Bridgerton, in the fifth of her beloved Regency-set novels featuring the charming, powerful Bridgerton family, now a series created by Shondaland for Netflix. ELOISE'S STORY Sir Phillip knew that Eloise Bridgerton was a spinster, and so he'd proposed, figuring that she'd be homely and unassuming, and more than a little desperate for an offer of marriage. Except . . . she wasn't. The beautiful woman on his doorstep was anything but quiet, and when she stopped talking long enough to close her mouth, all he wanted to do was kiss her . . . and more. Did he think she was mad? Eloise Bridgerton couldn't marry a man she had never met! But then she started thinking . . . and wondering . . . and before she knew it, she was in a hired carriage in the middle of the night, on her way to meet the man she hoped might be her perfect match. Except . . . he wasn't. Her perfect husband wouldn't be so moody and ill-mannered, and while Phillip was certainly handsome, he was a large brute of a man, rough and rugged, and totally unlike the London gentlemen vying for her hand. But when he smiled . . . and when he kissed her . . . the rest of the world simply fell away, and she couldn't help but wonder . . . could this imperfect man be perfect for her?

Kill the Fuhrer-Denis Rigden 2011-11-08 During the Second World War, Britain's top secret Special Operations Executive plotted to assassinate Hitler. A small department of SOE known as Section X had the tantalisingly complex task of investigating how, when and where their plan could be executed. The section also plotted the killing of Goebbels, Himmler and other selected members of Hitler's inner circle. Only Section X and a handful of other SOE staff had any knowledge of these projects, codenamed Operation Foxley and Operation Little Foxleys. As history has shown, these schemes turned out to be pipe dreams. Even so, Section X, renamed the German Directorate in 1944, made a huge contribution to the Allied war effort through their organised sabotage and clandestine distribution of black propaganda. Denis Rigden describes Section X's efforts to discover as much as possible about the intended assassination targets, and questions whether a successful Operation Foxley would have helped or hindered the Allied cause. Based on top secret documents and private sources and illustrated with archive photographs, 'Kill the Fuhrer' is an intriguing insight into the shadowy world of Britain's wartime secret

services.

Final Report-International Commission on the Holocaust in Romania 2005 The International Commission on the Holocaust in Romania was established in October 2003 on the initiative of Ion Iliescu, the President of Romania; this final report was presented to him in November 2004. The aim of the Commission was to research the facts and determine the truth about the Holocaust in Romania during World War II. The report examines various aspects of the state-organized participation of Romania in the mass murder of Jews in Romania and in Romanian-controlled territories, as well as in northern Transylvania where the genocide was perpetrated by the Nazis and their Hungarian allies. Inter alia, it discusses antisemitism and the evolution of Romanian anti-Jewish policies from the late 1930s to 1944, the impact of the Soviet annexation of Bessarabia and Northern Bukovina on antisemitism in Romania, anti-Jewish incidents in 1940 and the pogroms in Bucharest and Iași, mass murders of Jews in the recaptured provinces and deportation to Transnistria in 1941, mass murder of Jews in Odessa and in Transnistrian camps, the "Romanianization" of the economy and the expropriation of Romanian Jews, the reaction of the Jewish community in Romania to anti-Jewish policies, and the personal responsibility of Ion Antonescu for the genocide. Relates, also, to war crimes trials held in Romania, and to the trivialization of the Holocaust and its "selective" and outright denial in postwar Romania.

The Roy Adaptation Model-Callista Roy 1999 Compact and consistent, this book focuses on the essentials of nursing practice and theory while integrating the conceptual framework of the Model into contemporary practice. Standardized nursing NANDA diagnoses are used consistently throughout the book.

Computing Concepts with Java Essentials-Cay S. Horstmann 2003 Rather than exhaustively cover the entire language, the author focuses on a subset of Java--a lean and practical core that is manageable, yet detailed enough to create powerful Java applets. As readers master the basics of Java, they'll be developing solid programming skills that will increase effectiveness no matter which language they work with.
