Curso Especialista en Grafología laboral-José Manuel Ferro Veiga 2020-01-15 Reconocida y abordada científicamente, la grafología se ocupa del estudio e interpretación de los grafismos: todo símbolo que sea dibujado o trazado a mano. El grafismo más comúnmente utilizado en el estudio grafológico es la letra, aunque también se analizan la firma y rúbrica, los números, los dibujos y los garabatos. A través de su análisis, la escritura revela la personalidad del autor, el carácter, las emociones y otros diversos factores de distinta relevancia. Es un espejo completo del consciente y del inconsciente, de las ambiciones y los potenciales personales, y de todas aquellas cualidades y características propias que hacen a cada ser humano único.

Manual de supervivencia del Perito Judicial en Propiedad Intelectual e Industrial- José Manuel Ferro Veiga 2020-01-16 La numerosa clientela de los productos falsificados se compone sobre todo de personas con poco poder adquisitivo y más o menos conscientes de comprar artículos de imitación, pero poco avisadas de que algunos pueden resultar peligrosos para la salud, como los perfumes y los cosméticos. La mayoría también desconoce que, por dónde y cómo se venden esos artículos, prácticamente eliminan derechos básicos de los consumidores, como las garantías y la posibilidad de reclamación. Con las calles de las principales ciudades abarrotadas en busca de regalos, las Navidades son, junto con el verano, una de las épocas en que se dispara la venta de productos falsificados, artículos en general a precios "populares" que imitan o plagian los de marcas prestigiosas. Y, consecuentemente, aumenta el número de operaciones policiales, incautaciones y detenciones en el top manta, mercadillos, bazares, tiendas con pocos escrúpulos y almacenes para la distribución y venta ilegal a pie de calle o por Internet. Como muestra de esta realidad, el pasado verano fue pródigo en la "caza" del producto falso. A primeros de julio de 2018, la Guardia Civil dismanteló en Valencia dos fábricas de pilas falsas con más de un millón de unidades en stock y el doble de etiquetas y embalajes con los logotipos de marcas del sector. Fabricadas por empleados en condiciones penosas y sin controles de calidad, esas pilas podrían resultar peligrosas para los aparatos y las personas que las utilizaran. Durante los Sanfermines, la Policía Nacional detuvo en Pamplona a una banda especializada en delitos contra la propiedad industrial e intelectual con tres toneladas de calzado y ropa de vestir y deportiva, en apariencia, de marcas de primera fila valoradas en dos millones de euros. Pero no todo se limita a productos de uso cotidiano. A finales de julio, se dismanteló una organización que vendía vinos de Ribera de Duero de unos 20 euros a precios de hasta 1.900 euros la botella. Los hacían pasar por caldos de marcas tan exclusivas como Flor de Pingus, Vega Sicilia Único y Vega Sicilia Quinta Valbuena y los vendían en Internet, en portales de subastas e incluso en restaurantes de categoría. Muchas de estas operaciones parten de denuncias de marcas afectadas por la falsificación. Eso ocurrió, por ejemplo, a finales de agosto de 2018 con el decomiso en cinco tiendas de un centro comercial de Benidorm (Alicante) de medio millar de bolsos, carteras, gorras, colgantes, pendientes y relojes de marcas conocidas. Uno de los denunciante fue la Federación de la Industria Relojera Suiza. La marca de ropa y complementos Michael Kors puso una denuncia similar que trajo consigo a primeros de septiembre una redada en seis locales de La Junquera (Girona) y que se saldó con la retirada de unas 5.000 piezas de ropa, calzado y bolsos. También a finales de verano, se dismanteló a partir de una denuncia un centro de distribución en Palma donde se incautaron 8.300 artículos presuntamente de marcas de lujo como Adidas, Louis Vuitton, Gucci, Hugo Boss y Armani, cuya venta callejera habría hecho una caja de más de dos millones de euros. Estas operaciones policiales se repiten en otras épocas del año y no son más que el reflejo de una realidad: mientras el marketing siga creando en la sociedad el ansia de poseer, usar y lucir artículos de marcas famosas, y mientras sus precios estén fuera del alcance de buena parte de los consumidores,

habrá quien se la juegue con la ley fabricando, transportando y vendiendo falsificaciones, y no faltará quien, bien por desconocimiento o por "necesidad", las compre. Y no se atisba el menor indicio de que nada de eso vaya a cambiar. Al contrario, el mercado de lo falso sigue creciendo y alcanzando cifras asombrosas. En junio de 2018 la Oficina de Propiedad Intelectual Comunitaria (EUIPO) presentó los resultados de una investigación realizada en los últimos cinco años en toda la Unión Europea (UE) centrada en los 13 sectores más castigados por la piratería: artículos deportivos, baterías y pilas, bebidas espirituosas y vinos, bolsos y equipaje, cosméticos, perfumes y artículos de higiene personal, joyería y relojería, juguetes y juegos, música, neumáticos, pesticidas, productos farmacéuticos, ropa y teléfonos móviles. El informe de la EUIPO revela que, en esos sectores, las falsificaciones restan al mercado legal un 7,5 % de las ventas y que conllevan la destrucción de 434.000 puestos de trabajo y unas pérdidas en la UE de 60.000 millones de euros al año, por el no abono de impuestos, cotizaciones y otros ingresos. En todo el mundo, según la Interpol, estas pérdidas anuales ascenderían a más de 220.000 millones de euros. En España, estos 13 sectores pierden anualmente el 9,3 % de sus ventas: 6.200 millones de euros. En el caso de la perfumería y cosmética, ese porcentaje se eleva al 16,2 % (el doble de la media europea), según la patronal Stanpa: 933 millones de euros de los 5.828 que pierde anualmente el sector en la UE. La piratería de artículos deportivos en nuestro también duplica la media de la zona del euro, donde esta industria emplea a 43.000 trabajadores en 4.271 empresas y pierde 7.500 millones al año solo en artículos como balones, esquís y complementos. Visto el perjuicio económico y social que provocan los productos falsificados, no es de extrañar la gravedad de las acusaciones que suelen recaer sobre las personas detenidas en operaciones contra la piratería: pertenencia a organización criminal, delitos contra la salud pública, contra la propiedad industrial, estafa, blanqueo de capitales, evasión fiscal... Pero ¿y los consumidores que adquieren productos falsificados? ¿Cometen algún delito? El artículo 298.1 del Código Penal dice que será castigado con pena de prisión de seis meses a dos años quien, con ánimo de lucro y sabiendo que comete un delito "contra el patrimonio o el orden socioeconómico", reciba, adquiera u oculte productos de origen ilícito. Pero... ¿quién va a denunciar a un joven que compra por 25 euros en una web pirata o en las redes sociales una camiseta de su equipo favorito que en la tienda oficial cuesta cinco o seis veces más? ¿Quién denuncia a un ama de casa que compra en un mercadillo por 30 euros un bolso que parece de Chanel? ¿Y a una chica que adquiere en un bazar "unas gafas de sol Ray-Ban" por 42 euros? ¿Cómo demostrar que eran conscientes de comprar cosas pirateadas y de ser cómplices de ese mercado ilegal? Habrá consumidores que compren productos falsos a sabiendas. Pero muchos otros piensan que han encontrado un chollo que estaba en promoción, y algunos son víctimas de una estafa pura y dura. De ahí que apenas se tengan noticias -en EKA/ACUV no conocemos ninguna- sobre denuncias, juicios y menos aún condenas a consumidores por comprar productos falsos. Cuando se hace una redada en el top manta o en un almacén con productos falsos, quienes tratan de escapar son los vendedores; a los compradores no los detiene la Policía ni los acusa de nada. Esa es la realidad, que no obsta para que, consciente o inconscientemente, los compradores de productos falsos contribuyan a sostener ese mercado y sus consecuencias.

Programa autoaplicable de asesoramiento vocacional-Federico Valls Fernández 1996 Esta obra trata de ofrecer, a todos los implicados en la orientación vocacional de nuestros escolares, un programa de orientación que se ha mostrado efectivo y sólidamente fundamentado, un programa autoaplicable para ser utilizado por alumnos de Bachillerato con un mínimo de supervisión por parte de orientadores o tutores. Se ha tratado de paliar, en parte, el déficit de orientadores especializados en Orientación Vocacional a través de una técnica de intervención económica (en tiempo y personal) y adaptada para poder ser utilizada en grandes grupos. El libro presenta, en primer lugar, los enfoques teóricos en los que inspira el programa (Tipológico de Holland y Modelo de Toma de Decisiones de Krumboltz); en segundo lugar, se describe el programa y, finalmente, se relata el procedimiento evaluativo que ha permitido confirmar su efectividad. Federico Valls Fernández es Doctor en

Psicología y profesor del Departamento de Psicología Evolutiva y de la Educación de la Universidad de Almería. Es autor de diversas investigaciones centradas en el campo de la Psicología Vocacional.

Vocational Interests of Youth in Ecuador-Mariusz Wołóńciej 2018 This methodologically sound psychometric tool has been handed to Ecuadorian psychologists and teachers as a guide in the career counselling field. The tool will have a significant impact on the democratization of youth, assisting them to make well-targeted choices when planning their education and career. The authors' study may be viewed as pioneering work, due to its consideration of the significant cultural and geographic regional differentiation among graduates from the Pacific coast, the Andes, the Amazon rainforest and the Galapagos Islands. Reaching to the classics of literature on the subject, the authors have performed a momentous work, which is the construction of a psychometric tool that will be helpful in diagnosing career interests in the entire population of Ecuadorian youth. Worth additional acknowledgement are the high reliability indicators of the career interests questionnaire conducted on a representative and large study group, as well as the defined psychometric accuracy of the scale. This publication makes a civilizational quantum leap in the education of Ecuadorian youth, guaranteeing them a career choice that corresponds to their interests and ambitions. This pioneering publication on the Polish and world markets confirms the fact that Polish psychologists have the capability to "export" the psychometric school of thought to the Latin American region, with all of the scientific, social and humanitarian consequences involved.

Personality Disorders In Children And Adolescents-Paulina F. Kernberg 2008-08-04 In the first book to argue that neurotic, psychotic, and borderline personality disorders can be identified, diagnosed, and treated even in the young, a renowned child psychiatrist marshalls her developmental perspective and adduces clinical evidence to support it. Kernberg and her colleagues elucidate assessment criteria and advance therapeutic approaches for each disorder.

Vocational Interests-Mark Savickas 1999 This landmark work summarizes the current state of the field of vocational career counseling and examines its most pressing issues: What are vocational interests, and how do they develop? How can vocational interests be measured? How should counselors use interest measures in career intervention?

Serious Games Analytics-Christian Sebastian Loh 2015-06-13 This volume brings together research on how gameplay data in serious games may be turned into valuable analytics or actionable intelligence for performance measurement, assessment, and improvement. Chapter authors use empirical research methodologies, including existing, experimental, and emerging conceptual frameworks, from various fields, such as: computer science software engineering educational data mining statistics information visualization. Serious games is an emerging field where the games are created using sound learning theories and instructional design principles to maximize learning and training success. But how would stakeholders know what play-learners have done in the game environment, and if the actions performance brings about learning? Could they be playing the game for fun, really learning with evidence of performance improvement, or simply gaming the system, i.e., finding loopholes to fake that they are making progress? This volume endeavors to answer these questions.

The Clinical Practice of Career Assessment-Rodney L. Lowman 1991 The model of career assessment I present here is called the interdomain career assessment model. This book is intended to introduce practicing psychologists and graduate students in psychology to the pleasures of a neglected area of clinical assessment. Career assessment is not neglected in the sense that psychologists are avoiding work in this area, but there is a need for the development of a more rigorous science and richer clinical literature.

The Order-Disorder Paradox-Nathan Schwartz-Salant 2017-04-11 Increasing order in a system also creates disorder: this seemingly paradoxical idea has deep roots in early cultures throughout the world, but it has been largely lost in our modern lives as we push for increasing systematization in our world and in our personal lives. Drawing on nearly five decades of research as well as forty-five years working as a psychoanalyst, Nathan Schwartz-Salant explains that, in a world where vast amounts of order are being created through the growing success of science and technology, the concomitant disorder is having devastating effects upon relationships, society, and the environment. As a Jungian analyst with training in the physical sciences, Schwartz-Salant is uniquely qualified to explore scientific conceptions of energy, information, and entropy alongside their mythical antecedents. He analyzes the possible effects of created disorder, including its negative consequences for the creator of the preceding order as well as its potentially transformative functions. With many examples of the interaction of order and disorder in everyday life and psychotherapy, The Order-Disorder Paradox makes new inroads into our understanding of the wide-ranging consequences of the order we create and its effects on others and the environment.

The Essential Theatre-Oscar Gross Brockett 2004 The Eighth Edition of THE ESSENTIAL THEATRE will help you get your students excited about theatre. The combined authorship of an authoritative theatre historian and his former student, an active theatre historian himself, make this the book perfect for your introductory theatre course. In the 35 years since it was first published, THE ESSENTIAL THEATRE has established a reputation as one of the most comprehensive, authoritative surveys of the theatre in academia. Now in a new full color format with many representations of current and classic performances, this text will encourage your students to become active theatergoers and fans. THE ESSENTIAL THEATRE works in tandem with its companion anthology, PLAYS FOR THEATRE. The scripts in PLAYS serve as a foundation for discussion of the various types of theatrical experience explored in the text.

Adapting Psychological Tests and Measurement Instruments for Cross-Cultural Research-Vladimir Hedrih 2019-12-06 Adapting Psychological Tests and Measurement Instruments for Cross-Cultural Research provides an easy-to-read overview of the methodological issues and best practices for cross-cultural adaptation of psychological instruments. Although the development of cross-cultural test adaption methodology has advanced in recent years, the discussion is often pitched at an expert level and requires an advanced knowledge of statistics, psychometrics and scientific methodology. This book, however, introduces the history and concepts of cross-cultural psychometrics in a pedagogic and simple manner. It evaluates key ethical, cultural, methodological and legal issues in cross-cultural psychometrics and provides a guide to test adaptation, data analysis and interpretation. Written in an accessible manner, this book builds an understanding of the methodological, ethical and legal complexities of cross-cultural test adaptation and presents methods for test adaptation, including the basic statistical procedures for evaluating the equivalence of test versions. It would be the ideal companion for undergraduate students and those new to psychometrics.

Counselling in a Multicultural Society-Stephen Palmer 1998-12-10 `The book aptly describes, explores and hits the core of very complex issues around race, racism, culture, difference, dual identity, stereotypes, immigration and alienation... It is also very thought-provoking, raising questions about one's own ability to work more flexibly in the consulting room with clients of different backgrounds.... It is excellent for a directory of resources, useful for training purposes and an enabling "role model" for good practice in counselling in a multicultural society. I enjoyed it.... It should be a required handbook on the shelf of every caring professional working within a multicultural environment or setting' - Transformations, The PCSR Journal This book examines the many complex issues surrounding counselling and therapy in a multicultural society. It aims to sensitize readers to the cultural and racial setting in which counselling occurs, and to raise awareness of the specific counselling needs of those from differing backgrounds. The book explores the impact of culture on identity, and of cultural differences on interaction. It looks at how one might take a client's cultural context into consideration, or deal with racism, and provides a sophisticated account of the salient value systems of Western and non-Western cultures. Contributors also challenge the suitability of a client-centred approach for clients from non-Western backgrounds, and explore the possibilities for transcultural, culture-centred and multimodal models of counselling in the West.
