**Free Culture**-Lawrence Lessig 2016-07-30  
Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.

**Geometric Folding Algorithms**-Erik D. Demaine 2007-07-16 Did you know that any straight-line drawing on paper can be folded so that the complete drawing can be cut out with one straight scissors cut? That there is a planar linkage that can trace out any algebraic curve, or even 'sign your name'? Or that a 'Latin cross' unfolding of a cube can be refolded to 23 different convex polyhedra? Over the past decade, there has been a surge of interest in such problems, with applications ranging from robotics to protein folding. With an emphasis on algorithmic or computational aspects, this treatment gives hundreds of results and over 60 unsolved 'open problems' to inspire further research. The authors cover one-dimensional (1D) objects (linkages), 2D objects (paper), and 3D objects (polyhedra). Aimed at advanced undergraduate and graduate students in mathematics or computer science, this lavishly illustrated book will fascinate a broad audience, from school students to researchers.

**Task Design In Mathematics Education**-Anne Watson 2015-10-26 This book is the product of ICMI Study 22 Task Design in Mathematics Education. The study offers a state-of-the-art summary of relevant research and goes beyond that to develop new insights and new areas of knowledge and study about task design. The authors represent a wide range of countries and

cultures and are leading researchers, teachers and designers. In particular, the authors develop explicit understandings of the opportunities and difficulties involved in designing and implementing tasks and of the interfaces between the teaching, researching and designing roles - recognising that these might be undertaken by the same person or by completely separate teams. Tasks generate the activity through which learners meet mathematical concepts, ideas, strategies and learn to use and develop mathematical thinking and modes of enquiry. Teaching includes the selection, modification, design, sequencing, installation, observation and evaluation of tasks. The book illustrates how task design is core to effective teaching, whether the task is a complex, extended, investigation or a small part of a lesson; whether it is part of a curriculum system, such as a textbook, or promotes free standing activity; whether the task comes from published source or is devised by the teacher or the student.

**In a Holiday**-Christina Lauren 2020-10-20 THE INSTANT NEW YORK TIMES BESTSELLER One Christmas wish, two brothers, and a lifetime of hope are on the line for hapless Maelyn Jones in In a Holiday, the quintessential holiday romantic novel by Christina Lauren, the New York Times bestselling author of The Unhoneymooners. It's the most wonderful time of the year...but not for Maelyn Jones. She's living with her parents, hates her going-nowhere job, and has just made a romantic error of epic proportions. But perhaps worst of all, this is the last Christmas Mae will be at her favorite place in the world—the snowy Utah cabin where she and her family have spent

every holiday since she was born, along with two other beloved families. Mentally melting down as she drives away from the cabin for the final time, Mae throws out what she thinks is a simple plea to the universe: Please. Show me what will make me happy. The next thing she knows, tires screech and metal collides, everything goes black. But when Mae gasps awake...she's on an airplane bound for Utah, where she begins the same holiday all over again. With one hilarious disaster after another sending her back to the plane, Mae must figure out how to break free of the strange time loop—and finally get her true love under the mistletoe. Jam-packed with yuletide cheer, an unforgettable cast of characters, and Christina Lauren's trademark "downright hilarious" (Helen Hoang, author of *The Bride Test*) hijinks, this swoon-worthy romantic read will make you believe in the power of wishes and the magic of the holidays.

Millie Morris has always been one of the guys. A UC Santa Barbara professor, she's a female-serial-killer expert who's quick with a deflection joke and terrible at getting personal. And she, just like her four best guy friends and fellow professors, is perma-single. So when a routine university function turns into a black tie gala, Millie and her circle make a pact that they'll join an online dating service to find plus-ones for the event. There's only one hitch: after making the pact, Millie and one of the guys, Reid Campbell, secretly spend the sexiest half-night of their lives together, but mutually decide the friendship would be better off strictly platonic. But online dating isn't for the faint of heart. While the guys are inundated with quality matches and potential dates, Millie's first profile attempt garners nothing but dick pics and creepers. Enter "Catherine"—Millie's fictional profile persona, in whose make-believe shoes she can be more vulnerable than she's ever been in person. Soon "Catherine" and Reid strike up a digital pen-pal-ship...but Millie can't resist temptation in real life, either. Soon, Millie will have to face her worst fear—intimacy—or risk losing her best friend, forever. Perfect for fans of *Roxanne and She's the Man*, Christina Lauren's latest romantic comedy is full of mistaken identities,

hijinks, and a classic love story with a modern twist. Funny and fresh, you'll want to swipe right on *My Favorite Half-Night Stand*.

**Pedagogies of Disaster**-The Department of Eagles 2013-10-07 We live in an era where the university system is undergoing great changes owing to developments in financing policies and research priorities, as well as changes in the society in which this system is embedded. This change toward a more market-oriented university, which also has immediate effects in academic peripheries such as the Balkans, the Middle East, or South-East Asia, is of great influence for the pedagogical practice of "less profitable" academic areas such as the Humanities: philosophy, languages, sociology, anthropology, history. This volume (presented in a dual-language English-Albanian edition) comprises papers culled from continent. journal's Pedagogies of Disaster conference held in Tirana, Albania, hosted by The Department of Eagles (Departamenti i Shqiponjave) in June 2013, and organized to address the fate of relation and the

future of pedagogical practice in the University, and especially as it concerns the humanities. The papers gathered here seek to address the infrastructural or interpersonal changes in the modes of production as it relates to current academia, examining the elements and spaces of the rifts opening up in the polis of the University-its students, professors and administrators. The volume further addresses the pedagogical horizon at a critical limit, asking: for whom or for what are we teaching and from whom or from what are we learning?
